## Mutant 38

The result of extensive testing and feedback from the vertical world, the Osprey Mutant 38 provides a simple, strong, lightweight solution in a minimalist style for short alpine adventures or multi-day mountain trips. The Mutant 38 features a Reverse Wrap ErgoPull Hipbelt, Axe Loops and a Gorilla Grip Patch for durability. The 3-Point Haul System allows secure wall hauling. The Z-Compression makes load compression and adjustment rapid and easy. The backpanel is removable, made with Thermoformed EVA foam to maintain ventilation and minimize moisture absorption. The Mutant additionally features a floating/removable lid, hypalon racking loops, lid pockets and a spindrift collar, and a removable 3-fold Bivi pad. It is available in Black, and retails for \$149.
