Osprey Flies Super-Light With Hornet. Osprey Packs will introduce the ultra-light Hornet Series in spring/summer 2011. These super-lightweight packs have been stripped down to the essentials for ultra runners, adventure racers, peak baggers or anyone who aspires to move quickly with minimal weight. The Hornet series packs are available in 24L, 36L and 42L capacities and weigh from 1 pound 2 ounces to 1 pound 8 ounces (510-680 g).

Features include: hydration sleeve, highly ventilated and supportive Bio-Stretch harness with sliding adjustable sternum strap, super-light spacer mesh vented backpanel with removable foam pad, Bio-Stretch hipbelt with zippered hipbelt pockets and ErgoPull closure, adjustable overskirt compression strap, 7 mm webbing side compression, front stretch mesh

pocket, side mesh pockets with InsideOut compression straps, removable zippered top pocket with under lid mesh map pocket and key clip. Color is crimson, sizes are S/M and M/L, weight is 24 oz (680 g), MSRP is \$159.

This pack is really sweet and carries very well; look for a future Backpacking Light review.
