Osprey Packs in Colorado are known for their high quality backpacks, and now they've entered the bike commuter market with new models with handy, bike friendly features.

The Momentum is designed with bike commuters in mind. The Momentum backpack features built-in snug fitting high visibility raincover, LidLock™ helmet clip, padded laptop sleeve, cell phone pocket on shoulder strap, key pocket on shoulder strap with retractable key clip, U-lock slot, two side compression straps, blinker light attachment, front stash pocket (perfect for my bus pass!), internal storage for tools & pump, and zippered side pockets.

The Metron backpack has a more urban inspired look with a messenger bag style flap that works as an integrated rain cover. Like the Momentum, Metron also features Helmet LidLock, U-lock sleeve, padded laptop sleeve, cell phone pocket, key pocket w/ retractable clip, blinky attachment, and reflective detailing.

These bike bags from Osprey will be available Spring 2011. Also, don't miss Osprey's new Bike Blog. Osprey is located in the Four Corners region in Cortez, CO.
