CHECK YOUR BAGS

Sometimes getting to the crag requires more than throwing your shoes and chalk in the back of your Subaru. Occasionally, you're required to travel long distances by air, land, or sea, and when those moments come, it's the **OSPREY VECTOR** bag that will get you there with everything you need. With sturdy wheels and a duffel bag handle, you can roll or carry this bag anywhere. Osprey bags are known for their durability, and this one is no different. One key feature for us dirty climbers is the special separate compartment for our *really stinky duds*. —GO
