The Outdoor Retailer Trade Show highlighted the newest camping, hiking and backcountry gear. We give you a first-chance look at the gear you need for 2011.

The Hornet from Osprey has been stripped to the essentials to offer the ultimate lightweight pack. Osprey technology still allows for great carry with features like a spacer mesh breathable backpanel, and vented stretch-fit harness and hipbelt.

Speed-friendly features are all on board, including stretch mesh front and side pockets, zippered hipbelt pockets, and energy-gel pockets on the shoulder straps. It comes in three sizes to fit both day-hiking and overnight needs.
