# You Dirty Girl

Our picks for the season's best new women's mountain biking gear are for ladies who like to get after it on singletrack.

## 2. Osprey Verve 7

Osprey's hard-backed reservoir system prevents sloshing and barreling while you're cranking on the bike, and makes it easy to put the reservoir into your pack when it's full. The women's specific Verve pack is a touch shorter than the men's version and features the same built-in magnet for quick bite-valve attachment. It's available in four different sizes, and we found the one-pound Verve 7 perfect for 2+ hour rides—there's enough space for a pump, tube, multi-tool and phone, and the bungee lacing system will stash an extra layer. **\$79; [ospreypacks.com](http://ospreypacks.com)**
