Osprey Raptor 10

Well-known backpack maker Osprey has made a big splash in [hydration](#) systems with its expansive Raptor line. The Raptor 10 is the second smallest among the four Raptor packs. At 610 cubic inches, it straddles the line between short-haul racer and long-distance packer. The pack benefits from Osprey's load-lightening suspension system and comfortable back panel. It also has a reinforced reservoir: The rigid design keeps the pack from rolling on your back and makes it easy to slip it inside the bladder sleeve.

Price \$100 Pack size 610 cubic inches Reservoir 100 ounces
