The Sirrus in use

Integrated Raincover

Front zipper

Airspeed Suspension Back Panel

Inside compartment

Osprey Sirrus 36

Whitney reviews the Osprey women's **Sirrus 36**.

This technical pack is perfect for day hikes and light over-night trips. Osprey does an exceptional job mastering women's specific fit and the Sirrus is no exception. Some of the highlights of this pack are the integrated rainfly, Airspeed Suspension back panel, and the many pockets. The small issue is the amount of long compression straps, the straps themselves are handy, but when they aren't in use or when your traveling it would be nice to be able to hide them. I highly recommend this pack, but be sure to try it on first!

Sizes: 36L, 24L

Price: \$139.00

Colors: Amethyst, Aquamarine

Best used for: This back performed best as a day pack, for overnight trips a larger pack is recommended.
