Sleek Sidecountry Ski Packs

5 pared-down packs for resort-based backcountry skiing

Osprey Karve 16

Osprey's designers spend a lot of time making packs that surpass expectations, and the Karve 16 provides ample proof of that. A comfy, thermo-sculpted back panel sheds unwanted snow, while diagonal lateral compression straps snugly hug the pack close to your body for an optimal skiing experience. The trim waist strap distributes the load equally over the hips for maximum comfort and dexterity, and external sleeves make use of limited material for quickly accessing the shovel handle and probe. A fully insulated sleeve keeps your hydration hose working on the coldest of days.
