Osprey Kode 22 pack

When our ski blogger needed a pack to tote her gear, we knew who to call. Osprey makes packs for serious play, and the **Kode**

22 is no different. It organizes your wet and dry gear into different compartments, and has multiple ski or snowboard options for carrying positions. Any ski or boarder would appreciate this thoughtful design

for either lift-serviced or back/sidecountry skiing or riding. Pretty easy to slide around to get in your lap for the lift ride as well.

Retail price: \$119 www.ospreypacks.com
