Outdoor Retailer Sneak Peek: Innovative Packs Coming 2014

Trail runners and endurance athletes will be psyched to see the Rev series hit the shelves next spring as a new, ultralight contender. The packs are offered in six sizes-- 24, 18, 12, 6, 1.5-liters and a single water bottle-- but the largest clocks in at only 1 lb. 3 ounces (sans reservoir). The Rev collection will feature the new Biostretch body harness and belt that Osprey claims will fit more like clothing than a traditional pack, allowing it to move with the wearer. Additional touches like a magnetic sternum piece for the reservoir tube or the DigiFlip media pocket for phone access make this series one to watch.
