## Outdoor Retailer: A Gear Nerd's Top 10 Picks

Outdoor Retailer Summer Market is every gear nerd's dream event. It was overwhelming and I never did see every product at the show, though I did find a number of items that made me say, "I wanna to play with THAT!" Below are 10 items that caught my attention. Not all are new to the industry; instead, they may have just been redesigned and improved. Some I've tried, others are on my "want" list, but all are worth checking out:

**Osprey Kode Snow Packs** – Osprey's backcountry snow packs have been updated based on feedback from athletes and professionals. Each size is designed to meet a specific need, from lift access to mountaineering. Basic features include multiple ways to carry ski and boards, helmet and non-scratch goggle stow, ice tool carry, and glove friendly buckles and pulls. Additional features are customized to each pack's function. Available for \$129-\$169
