Osprey Packs Ozone 22-Inch Convertible Wheeled Luggage: Big Storage in a Compact Size

And the awesome packs keep rollin' in. (Get it? No, really ... *d'ya get it?*) Seriously, in addition to their [Pixel Port daypack](#), Osprey Packs kindly supplied us with a test sample of their [Ozone 22-Inch Wheeled Convertible](#).

The new Ozone Convertible (also available in [a 28" model](#)) features an integrated zip-off daypack as well as an optional zip-stow, removable shoulder harness and hipbelt. Weighing just over 6 pounds (for the Ozone Convertible 22"), this daypack/roller duo is an ideal solution for ultra-light travelers.

Features include: a clever internal layout with zippered sidewall pockets, a large j-zip opening, a mesh front flap pocket and main compartment compression straps. Plus a built-in, torso-adjustable suspension system provides for a backpack carrying option with straps and a belt that can be easily stowed for rolling and check-in.

What's more: the included zip-off daypack can be used separately or in conjunction with the Ozone. The 15L pack includes internal organization and padded laptop/tablet sleeves.

Pricing + Availability

Available now in Light Green or Light Blue for around \$300 (USD) from [Amazon](#) (*aff*).
