Active Outdoor Gear to Put Under the Tree

From high-tech splurges to simple but necessary gear, this holiday guide has you covered when gifting your favorite outdoor athlete, or you know, treating yourself.

The Osprey Ozone Convertible Series has made active traveling easier for everyone—Osprey neatly combined a wheelable, lightweight suitcase with a backpack-carry option that also has an easily detachable, zip-off daypack. The suspension system can be fully removed for trips where you won't need to carry the pack on your back. For the suitcase, you'll get all the regular amenities like external pockets, padded carry handles and an extendable handle, but also an adjustable harness, a padded mesh back panel and a hip belt for when you want to sport a pack. The 15-liter daypack has padded shoulder straps and is laptop compatible. 50L, \$299; 70L, \$329; ospreypacks.com
