Osprey Offers More Solutions for Backcountry Skiers

Cortez, Colo. – For Fall/Winter 2014, Osprey Packs will add to its offering the Kode ABS Compatible Series. Available in two varieties, the Kode ABS Compatible backpack enables the user to remove the pack from the back panel and attach a small or large ABS Vario Base Unit in its place. The backpack also includes an insulated hydration tube sleeve in the harness, zippered pockets on the hipbelt, a dry and wet gear division, and ski and snowboard carry features.

The Kode ABS 40, a larger pack with top and panel access, is priced at \$220 (MSRP); the Kode ABS 22 + 10 is priced at \$200 (MSRP).
