## Best Carry-On Finalists – The Second Annual Carry Awards

### Osprey Ozone Convertible 22"

Being able to swap between wheeling or carrying sounds awesome, but hybrid packs have generally suffered from being too heavy or awkward to bother with. The Ozone finally gets this equation right, through hard work and evolution. Weighing 6lbs (2.75kg) with its added zip-on backpack, this bag is light even when compared to pure wheeled cases. Refined pattern work, just enough features, and a convertible system that doesn't need a rocket scientist, this is Osprey at their best.
