New Trail Running Gear for Summer

Kit Up!

Warm weather, blooming flowers, and green hillsides are calling trail runners everywhere with the promise of spring and summer. Whether you're in need of an update to your trail running kit or aren't sure what exactly you need to make your trail running experience more comfortable, here's the lowdown on the latest apparel and more for the sunnier seasons.

Osprey Rev Solo, \$40

This 20-ounce, uniquely shaped bottle from **Osprey** sits comfortably against your low back without much bounce in this waist pack. A zippered pocket with a clear plastic window allows you to see who's calling or texting before you take the time to unzip your phone mid-run.
