These deluxe travel packs provide the ultimate in mobility for everything from two-week trekking vacations to year-long around the world forays. Utilizing proven suspension from the Volt and Viva Series, Waypoint comes in one size for men and the new Wayfarer comes in one size for women, each offering excellent adjustability for superior fit.

The new zip away padded harness and hipbelt have direct connection to a LightWire™ peripheral frame that supports the weight that backpacking and traveling for extended periods of time necessitates. A large torso adjustment range ensures a perfect fit and hidden behind this adjustable harness is a secret security zippered pocket to store money, passport or other travel documents.

Key to this season's redesign is the addition of the fully featured Port Day, a removable daypack with Osprey's innovative Port™ Window tablet access. This zippered sleeve features touch-sensitive film that allows tablet use without removing it from the daypack.
