# Your 2014 Holiday Gift Guide

You'll find a gift for everyone on your list this season with some helpful suggestions from our Gear and Beer Editor, Hilary DelRoss. You're sure to please the picky and inspire the intrepid with this line up of unique and accessible ideas, some of which come from right here in Vermont.

### Osprey Tempest 20

Influenced by the popular Talon Series for men, the Tempest has recently been added to Osprey's line of women's specific packs. Innovations in both series this season reduced weight and increased comfort. The mesh and foam harness and hip belt provide comfortable, load-bearing stability and extra easily accessible pockets. The back panel has been reconfigured to include a foam air chimney to increase ventilation away from the body and the hydration sleeve is accessed from the back of the pack. A helmet attachment can also be found on the exterior for hands-free storage between rides. Now adventurers of all shapes

can experience this fantastic pack tailored to a variety of size and volume needs. \$100
