OSPREY SHUTTLE SERIES, \$290-\$320

If you want a burley, durable suitcase built for hauling your outdoor gear along with your everyday wear while on an adventure, the Osprey Shuttle Series is for you. The Shuttle Series has foam padded sidewalls, a large opening, Osprey's StraightJacket to provide security and protection for gear transit, a back pocket for extra organization and grab handles both on the top and the sides. The StraightJacket system uses a front panel compression strap to produce varying levels of compression to secure the load and add stability even when the pack isn't full. Whether you're in the airport or on gravel roads, the all-terrain wheels make for great maneuverability. The Shuttle Series is versatile, light and stable and will adapt to the adventure and gear it carries. Two sizes will be available, 100L and 130L.
