Osprey Updates Urban Flap Series for Fall 2015

Cortez, CO – January 13, 2015 – [Osprey Packs](#), a leader in creating top-quality, high-performance, innovative packs to comfortably and efficiently carry gear, is introducing all-new design as well as feature updates to its popular **Flap Series** for Fall 2015.

“Key to the Flap Series redesign is fresh styling including clean, modern design lines, a single flap closure and an all-new performance fabric that has a soft, canvas-like feel,” said Jeff Fox, Senior Marketing Manager, Osprey Packs. “While attractively minimal on the outside, the internal organization of the Flap Series makes them very user-friendly whether commuting or traveling.”

Flap Series features include:

- Top zippered flap stash pocket
- Reflective graphics for commuting at night
- Fabric side water bottle pocket
- Full length side zippered pocket
- Flap access to main compartment with single buckle closure
- Blinker light attachment and reflective patches
- Low profile top carry handle
- Main compartment padded laptop sleeve
- Main compartment tablet sleeve and document sleeve
- Under flap zippered front panel stash pocket
- Under flap zippered front panel organization pocket

The Flap Series is available in men's specific (FlapJack) and women's specific (FlapJill) designs.

In addition to the fully updated FlapJill packs and couriers, Osprey is introducing the new **FlapJill Micro**, a shoulder bag for women who want to bring their outdoor world into their everyday life. With big organization in a small and sleek package, the FlapJill Micro features a zippered main compartment with an internal zippered pocket, under flap organization and an adjustable webbing shoulder strap with metal buckles.
