Osprey Releases Redesigned Fast and Light Viper/Verve Bike Hydration Packs for Spring 2016

Cortez, CO – July 27, 2015 – Osprey Packs, a leader in creating top-quality, high-performance, innovative packs to comfortably and efficiently carry gear, is redesigning their popular **Viper and Verve Series** for the Spring/Summer 2016 season, utilizing the **Osprey LT Hydraulics™ Reservoir** to deliver a lighter, high performance, cycling pack. In addition to

the LT reservoir, the series features a streamlined, contemporary design aesthetic as well as an all-new three liter size.

"The Viper and Verve series deliver outstanding functionality in a lightweight, versatile design," said Cassie Tweed, Director of Design, Osprey Packs. "The introduction of a front, shove-it pocket for the Spring 2016 season increases the range of use for the pack in the larger volumes while the launch of the three liter volume offers a simple solution for riders looking to carry no more than some keys and water."

Viper (Men's)/Verve (Women's) Carry Features:

- Suspension Atilon Foam framesheet allows dynamic body movement while it spreads load across the entire backpanel.
- Airscape™ Backpanel Mesh covered ridged foam allows maximum ventilation while keeping the load close to the body.
- Biostretch™ Harness Mesh covered die cut foam provides an active and contouring fit and ventilation.
- Webbing Hipbelt Removable 20mm webbing hipbelt for ride stabilization.

Available in:

- VIPER 13 MSRP: \$110
- VIPER 9 | VERVE 9: MSRP: \$100
- VIPER 3 | VERVE 3: MSRP: \$80
