Featuring: The FlapJack Courier

URL: <http://tinyurl.com/37fwlr3>

Even if your commute involves no pedaling, this new courier-style bag from Osprey will deliver you to the office or elsewhere with your MacBook intact. A floating, padded laptop sleeve protects your machine with room enough for all the other junk. If you actually do ride in, you'll be hyped on the comfy ergonomics of the bag & features like a light attachment slot and reflective styling hits.
