The 5 Necessities for a Big Trail Ride

Featuring: The Raptor 10

Circulation: 438,658

Readership: 1,315,974

Osprey Raptor 10 pack \$89

The rugged Raptor 10 features 600 cubic inches of well-thought-out storage, a laundry list of features and a three-liter reservoir, plus external compression straps that keep smaller loads in place. Osprey's 35-year history of pack making shines in the Airscape suspension system, which features a ridged foam back panel and hard frame sheet to help support the load and keep it off your body for greater cooling. The contoured shoulder pads and straps stabilize the pack even on rough downhills. INFO: ospreypacks.com
