Karve

The Karve series was designed to offer sharp styling and practical utility for the rider seeking sidecountry adventure. The packs are low profile, and carry most shovels and probes. They also offer quick ski and snowboard carry options and insulated hydration delivery. The Karve features a Thermo-formed backpanel with an HDPE plastic frameset, removable Ergopull waiststrap, EVA fixed harness with slide-adjustable sternum strap and full foam-padded front panel to prevent ski edge wear.
