Osprey Talon 22

The trail gives you a mind-restoring freedom unlike anything else in life, and the Osprey Talon 22 Backpack ensures you don't venture into the wild world without a vital piece of gear or clothing. With plenty of space for all-day hikes into the canyon or to a summer summit, the Talon 22 goes heavy on the comfort without the extra weight. AirScape ventilated back panel keeps the sweat off your back while keeping the load balanced and an external hydration compartment allows you to access your water reservoir without having to go through the main compartment (water reservoir not included). For the trail hound... this is the gift that keeps on giving.
