Gear of the Year 2012: Outdoor Gear TV's Top Picks

We've tested some really great gear during 2012 on Outdoor Gear TV, so choosing our top five was not an easy task. We narrowed it down, and here it is folks, our top picks for 2012 gear.

3. Osprey Sirrus 36- This little pack can do big things. I've used it for everything from carry-on during travel, light over-night trips and day hikes. If you need just one pack that will work for just about anything, the Sirrus 36 is it. Thanks to Osprey's exceptional women's fit, this pack is no doubt one of my favorites from this year.
