### For you & yours

Nine items that will light up any cyclist's holiday

**1 OSPREY OZONE PACK » \$230**  
 Small enough to get past even the strictest gate agent's carry-on standards, the Ozone is incredibly strong, thanks to its aluminum skeleton, yet still weighs less than half of most similar-sized roller bags — just a hair over four pounds. A large main compartment joins up with two smaller front pockets to hold everything the weekend warrior needs on or off the bike. Two large, durable wheels will keep you rolling — not dragging — down the jetway for years.

**2 MURCKY 535 » \$80**  
 A beautiful, hand-finished commemorative that belongs on the coffee table of every dedicated cyclist, Murcky 355 is a visual celebration of the unmatched career of Eddy Merckx. Unique photos, many never before seen outside of Europe at Merckx's own family album, weave the story of an incredible life. From Belgium youth to his final Dutch team, Merckx, the greatest cyclist of all time, called the book "the best truly complete record" of his accomplishments.
