## 2013 Outdoor Retailer Winter Market Highlights

Get ready folks, Fall 13 is lookin' good! For three days the OGTV crew charged from booth to booth, looking at the latest gear. We shared many of the highlights over on our Facebook page, but we saved some of the most interesting pieces we saw for our 2013 Outdoor Retailer Winter Market Highlights.

Osprey launches the Portal series. Use those tablets and iPads without taking it out of your pack. These packs are clean and simple on the outside, but on the inside they're loaded with features. Padded protection for your laptop, organizing panels, and a scratch-free pocket for your portable device. Prices range from \$99-\$139.

Osprey's Ozone launched this spring, but for Fall 13' they're introducing the convertible Osprey Ozone, available in 22" or 28", with a detachable 15L day pack (pictured half zipped above). Together it weighs in at 6 lbs. The pack can be wheeled, or worn as a backpack. Starts at \$299.
