## Sneak Peek at 2014 Trail Running Gear

We scanned the halls of last week's Summer Outdoor Retailer Trade Show in Salt Lake City, Utah, to bring you a preview of trail running-specific goods that haven't yet hit the market.

### Osprey's Rev Series

Designed specifically for trail runners, Osprey's new Rev Series packs utilize a new "Biostretch body wrap harness and belt" to move with you while you run for a fit that is "more like a shirt than a backpack." The packs include Osprey's new Hydraulics LT Reservoir that has built-in baffles to reduce sloshing and a brilliantly redesigned hose that detaches at the top of the bladder instead of the bottom for easy refilling.

A removable, touch-screen phone pocket flips down for easy access. This pack comes in five(!) sizes, the smallest pack being the Rev 1.5 (1.5 Liter reservoir, \$70, pictured), plus a Rev Solo (\$40) waist pack. (Available January 2014)
