HANDS-FREE HYDRATION

## FLUID DYNAMICS: HYDRATION PACKS FOR RUNNING

**Best Pack for Long Hauls:** As advocates of the run-commute, we've jogged between A and B with a day's worth of gear in everything from a **Goruck GR2** to a **Rapha cycling backpack** — anything in a pinch. The Osprey Rev series is geared toward runners with one of the most comfortable harness and belt systems (called "Biostretch") and lots of convenient features like an easily accessible media pocket on the chest harness and a reservoir with baffles (like a sleeping bag) to help minimize water sloshing. The 24 is the biggest version, carrying 2.5 liters of water with enough extra room for a change of clothes or miscellaneous gear for a **day of trail running or hiking.**

**BUY NOW: \$98**
