8 Summer Run Gear Essentials For Women

Osprey Rev 1.5 hydration pack

(\$70, Ospreypacks.com)

Hydration is critical on hot-weather runs, and this lightweight, minimalist hydration pack makes it easy when you're running on trails. It features a 1.5-liter reservoir as well as a mesh backpanel that's soft and breathable in hot temps. Our other favorite feature is the

DigiFlip media pocket, a weather-protected panel on one of the straps that gives you easy access to your smart phone without messing it up with sweaty fingers.

Why we love it:

The smaller reservoir with built-in baffles combined with its secure harness system to keep beverage sloshing to a minimum on runs—the sloshing doesn't become annoying.
