Osprey Radial 26 Daypack

Whether you commute by bike or on foot or just enjoy long treks, Osprey's full-featured Radial 26 Daypack has you covered. Remediating the biggest gripe we have with backpacks in general, an AirSpeed suspension backpanel coupled to ventilated straps keeps your back cool and dry through longer trips. Fortunately, this doesn't compromise the bag's capacity, which includes a padded 15" laptop compartment, a tablet sleeve, a large main compartment with three mesh organizers, dual water bottle slots, plus two smaller quick-access pockets on its front. Moreover, the Radial also packs numerous niceties, including a deployable high-visibility rain cover, a Lid Lock to secure your helmet to the bag, an external compartment for a U-lock, plus built-in reflectors, should you not make use of the blinker light attachment tab.

Find it at [Amazon](#) – \$160
