- + Removable and adjustable sternum strap
- + Front harness stretch mesh pockets
- + Breathable mesh wrap with soft, irritation-free contact surface

3. 15 mm MODIFIED ERGOPULL™ WEBBING HIPBELT

FEATURE DETAILS

BIOSTRETCH™ BODY WRAP HARNESS

The BioStretch™ Body Wrap harness wraps the ribcage for comfortable and stable fit. Sewn-in, stretch woven pockets on either side of the harness provide quick access to food and other gear without having to remove the pack. An adjustable, quick release sternum strap provides a variety of fit positions and provides torsional stability needed during dynamic movement. To detach the sternum strap from the harness, pull the fabric tab found on either sternum strap buckle. To adjust the sternum strap, slide it up or down on the harness rail into the desired position.

ERGOPULL™ WAISTSTRAP CLOSURE

The Kode Race features a fixed nylon waiststrap with a modified straight ErgoPull™ closure. To operate, loosen the webbing enough so that you can connect the center buckle. Grasp the loose ends of the webbing on either side and pull in and across evenly with both hands.

PANEL LOAD ACCESS

Zippered panel load access provides easy pack loading and access to internal contents. Detach the quick access crampon pocket toggle to maximize main compartment packing space.

TOOL CARRY

A single ToolLock™ attachment and bungee tool tie-off provides secure and easily accessible ice tool carry.

To use:

- 1 Route the ToolLock™ clip through the eyelet on the head of your ice tool.
- 2 Loosen the upper Y-clip bungee and secure the ice tool handle.
- 3 Reverse this process to remove the ice tool.

DIAGONAL SKI CARRY

An on-the-go diagonal ski carry harness retention strap works in conjunction with lower ski carry loop to allow ski carry and removal without taking off the pack, saving both time and effort when the terrain requires boot packing.

To utilize:

- 1 Locate the adjustable ski carry strap on the right harness and remove from the nylon loop to disengage.
- 2 Undo the hook and loop tab holding the lower left side diagonal ski carry loop to the pack body and slide skis in tail first, base to base, until the ski bindings are resting on the ski carry loop.
- 3 Pull the skis across the pack body to the right harness ski carry strap and adjust the strap to the proper length pulling up on the locking buckle tab to lengthen.
- 4 Engage the upper ski carry strap around the skis and tighten the strap to provide stable, accessible carry. Reverse this process to remove skis.

QUICK ACCESS POCKETS

A quick access hook and loop crampon pocket on the right side of the pack provides easy access and storage of crampons without removing the pack, while a stretch woven skin pocket on the left side of the pack allows for easy access and storage of skins without removing the pack.

HYDRATION

A sewn-in hydration sleeve located on the inside of the backpanel accepts up to a three liter reservoir and works in conjunction with a left side harness hydration exit port to deliver on-the-go hydration. A sewn-in reservoir hanger holds your hydration system in place.
